

NUTRICIA
Fortisip[®]
THE STRENGTH IN YOU

TOGETHER YOU AND YOUR TEAM CAN MAKE A DIFFERENCE
**KEEP ON STRENGTHENING
THEIR RESILIENCE.**

FOR HEALTHCARE PROFESSIONALS ONLY.

Fortisip products are food for special medical purposes and must be used under medical supervision.

YOUR EXPERT
PARTNER IN
NUTRITIONAL
CANCER CARE

FOOD ALONE IS OFTEN INSUFFICIENT TO COVER ALL NUTRITIONAL NEEDS WHEN GOING THROUGH CANCER^{1,2}

Up to 2 in 3 cancer patients do not meet their protein requirements³

64% of patients have experienced eating or nutrition problems as a consequence of their cancer treatment⁶

57% of patients report having lost more than 10% of their weight during cancer⁶

For these patients, ESPEN recognizes the importance of supplementing food with medical nutrition as an integral part of cancer care.*⁵

Fortisip products are food for special medical purposes and must be used under medical supervision.

*According to ESPEN guidelines, the additional use of ONS is advised when an enriched diet is not effective in reaching nutritional goals. Medical nutrition is indicated if patients are unable to eat adequately (e.g. less than 50% of the requirement for more than one week or only 50–75% of the requirement for more than two weeks).

YOUR CANCER CARE OUR TAILORED NUTRITION

You know better than anyone the importance of nutrition in improving treatment outcomes.

Discover our range of medical nutrition products to find the best suited option for your patients with cancer.

CANCER-RELATED MALNUTRITION

FORTISIP COMPACT PROTEIN

- High protein (18g per 125ml), high energy
- Small volume (125ml) to support adherence^{7,8}
- Broad range of flavours

For the dietary management of patients with or at risk of disease related malnutrition.

CANCER-RELATED MALNUTRITION AND TASTE ALTERATIONS

FORTISIP COMPACT PROTEIN SENSATIONS

- High protein, high energy
- Small volume (125ml) to support adherence^{7,8}
- Sensational flavours tailored to support patients with taste alterations⁹

For the dietary management of disease related malnutrition. Our SENSATIONS range is made of specially designed flavours for patients with taste alterations. They provide a cool or warm taste sensation.

CANCER-RELATED MALNUTRITION AND DAIRY ALTERNATIVE

FORTISIP PLANTBASED

- 12g plant protein per 200ml made with pea and soy protein
- High energy suitable as a sole source of nutrition (300kcal per 200ml)
- PlantBased suitable for a vegan diet

For the dietary management of patients with or at risk of disease related malnutrition due to cancer, chronic catabolic disease or cachexia.

PATIENTS WITH CANCER NEED UP TO 2X AS MUCH PROTEIN AS HEALTHY ADULTS^{^1,2}, BUT OFTEN EAT LESS

68% of patients*
report loss of appetite and
don't feel like eating³

60% of patients*
report that they feel full
quickly³

FORTISIP COMPACT PROTEIN

NOTES

NOTES

HELP MAXIMISE CANCER TREATMENT WITH THE RIGHT MEDICAL NUTRITION FOR YOUR PATIENTS NEEDS

“That’s the thing with cancer treatment, you think *“well I was a bit overweight, I’ve lost some weight,”* but it doesn’t work like that, you lose muscle.

Medical nutrition complemented my day-to-day diet. I started feeling more nourished and in general I felt stronger and more energised.

Jonathan - 59 years old, UK

Patient with mantle cell lymphoma - May 2022”

Together with your multidisciplinary teams,

YOU CAN MAKE A DIFFERENCE TO IMPROVE OUTCOMES FOR YOUR PATIENTS WITH CANCER
